Sustained and equitable socio-economic development can well be achieved by nurturing and promoting Entrepreneurship. However, to ensure a high incidence of entrepreneurship among various target groups, there is a need to create qualified and well-trained Entrepreneurship Trainers who could motivate, train, guide and counsel potential and existing entrepreneurs. Entrepreneur Trainer – Motivators are trained to assist and hand-hold entrepreneurs through the various stages of setting up and sustaining an enterprise.

To create a cadre of well trained 'Entrepreneurship Trainers' at the national level, EDII has designed impact- making virtual 'Trainers' Training Programme on Entrepreneurship. After the success of the first three programmes, EDII announces the 4th virtual programme in the series, to be organized during 5-9 July, 2021.
