Hackathon in City

Bhubaneswar: To promote sustainability among the entrepreneurs of the state, Entrepreneurship Development Institute of India (EDII) organised a 'Sustainability Hackathon Challenge 2023 - Boot Camp,' in association with World Trade Center (WTC) here Thursday. The Boot Camp, which was conducted at the KIIT School of Rural Management (KSRM) auditorium, had Batoi Systems Private Limited as the supporting partner along with KIIT School of Rural Management, Centre for Agri-business Management, AIC-Nalanda Institute of Technology, Srusti Academy of Management and Gandhi Institute for Technology as partner institutions. The hackathon challenged students to create solutions to real life problems facing society, industry sectors and government functionaries. It offered a credible opportunity to students and institutions to build upon initiatives like Atmanirbhar Bharat and Startup India by undertaking the challenges and converting opportunities to a business enterprise.
