Ahmedabad: National Conclave on Empowering Youth jointly held by EDII and DICCI NextGen – Gujarati News | Ahmedabad: National Conclave on Empowering Youth jointly organized by EDII and DICCI NextGen – Ahmedabad: National Conclave on Empowering Youth jointly organized by EDII and DICCI NextGen

The main agenda of the conclave was to identify the challenges and barriers to achieving diversity and inclusion in society and to discuss policies, measures and processes to promote inclusiveness.

Ahmedabad: National Conclave on 'Empowering Youth: Fostering Inclusion and Diversity' by Entrepreneurship Development Institute of India (EDII),

Ahmedabad and Dalit Indian Chamber of Commerce and Industry (DICCI) to engage youth and promote their active participation in India's G-20 Presidency was planned. The conclave was also supported by SIDBI and was organized to empower youth, provide them a platform for meaningful discussion, knowledge sharing and strengthen diversity and inclusion.

Founder Chairman of DICCI and Board Member of EDII Dr. Milind Kamble, Youth 20, Convenor Secretary Ajay Kashyap, SIDBI General Manager Sanjay Gupta, DICCI NextGen National Convener Maitreyi Kamble and EDII Director General Dr. Sunil Shukla was present.

The main agenda of the conclave was to identify the challenges and barriers to achieving diversity and inclusion in society and to discuss policies, measures and processes to promote inclusiveness. The conclave also discussed innovative measures to promote diversity and inclusion at various levels. Various technical sessions were also organized as part of this event. Various sessions discussed future operations in the context of the Fourth Industrial Revolution, measures to achieve inclusive practices and the importance of cooperation and inclusive policies for long-term sustainability – etc.

On this occasion Dr. Milind Kamble said, "People have enthusiastically participated in G-20. India is ahead of other countries. And this is the right time when the youth has to play a significant role and shoulder a great responsibility. They should present ideas, plans and strategies to help create a beneficial structure and system. The country's demographic diversity actually offers an opportunity to shine through Y-20 and lead progress. Social and economic inclusion is a progressive step that India has made extensive use of. I urge the youth to come forward and take advantage of this great time."

Talking about the importance of MSMEs and the role of youth in economic development, Sanjay Gupta said, "The need of the day is to ensure that youth get good employment. So self-reliance remains an effective option. Youths have to be guided to set up their own businesses. The role of MSME in the progress of any country is paramount. Youth have the ability to change the future of the country. They need to be trained so that they become partners in the progress of the country."

Addressing the gathering, Ajay Kashyap said, "India getting the G-20 Presidency is a landmark for the country. With this comes a historic responsibility for India. India is heading towards the future as a super power. Y20 is an innovative platform to ensure equality and inclusion. In addition to technical research, the youth of India has set an example in the world by expressing concern on the important issues of environment, renewable energy, climate change etc. I hope that this progress will continue with full capacity and energy."

Dr. Sunil Shukla said, "It is important for us as a country to channelize the talent of the youth towards research and creative work. Inclusion and diversity are ingrained in the fundamental values of this country. It is the youth's responsibility to lead progress on both these issues. Entrepreneurship is a way to cross borders and ensure balanced development without prejudice. Young people have to come forward in this, especially because they know more about research and technology and ultimately those things form the basis of startups and new businesses."

Concluding the event, Maitreyi Kamble said, "The youth of the country is aware and equipped with 21st century skills. They are eager to learn new skills and technology. Their attitude towards research is India's potential and therefore has to be nurtured and encouraged to achieve higher goals."
